Kadiri Talitu .I.

SOFTWARE ENGINEER

I'm a highly motivated Software Engineer with an impressive 7+ years of experience in developing innovative solutions and delivering exceptional results. Skilled in both front-end and back-end development, with a strong focus on robust architectural design, creating user-friendly interfaces and optimizing performance. I have a proven track record of driving project success, improving software functionality, and enhancing the overall user experience.

EXPERIENCE

SENIOR SOFTWARE ENGINEER ZOJATECH LIMITED
Aug. 2023 - Present

- Providing support for the design, development and implementation of Zojapay mobile app
- Led the development of Revvex – A budget management SaaS web application.
- Implemented bills payment support and API, bank transfer and overall performance improvement.

TEAM LEAD ENGINEERING SELSTACK LIMITED
Mar. 2021 – Aug. 2023

- Led the design and implementation of the entire system architecture, encompassing both backend and frontend components.
- Actively contributed to the company's efforts in creating a platform that is rock-solid, scalable, and robust, providing a unified solution to address both e-commerce and Customer Relations Management (CRM) needs.

FULLSTACK ENGINEER AFRIADVERTS LIMITED
Nov. 2017 – Aug. 2020

- Built an Ad network software for the organization which was being used by both advertisers and publishers.
- Designed and implemented the entire system architecture to ensure scalability and maintainability.
